Gurugram, India

Results-driven DevOps Engineer with 4+ years of experience in production operations, cloud infrastructure, automation, observability, monitoring, incident management, and reliability engineering. Hands-on experience with AWS, Linux, Kubernetes, Docker, Terraform, Ansible, Python, Bash, CI/CD, ELK Stack, Prometheus, Grafana, Zabbix, Datadog, and ServiceNow. Proven track record of automating operational workflows, supporting highly available production environments, troubleshooting distributed systems, and implementing scalable monitoring and alerting solutions. Achieved 65% automation of alert processing, 40% reduction in alert noise, 25% reduction in MTTR, and 50% reduction in recurring incidents. Experienced in Infrastructure as Code, production incident response, RCA, SLI/SLO, on-call operations, capacity management, and continuous reliability improvement, with practical application of GenAI for alert enrichment and incident summarization.

AWS

Kubernetes

AWS Lambda

WORK EXPERIENCE

DevOps Engineer-Accenture Jul 2022 - Present

- Designed, implemented, and supported highly available production infrastructure and applications across AWS, Linux, Docker, and Kubernetes environments, ensuring scalability, reliability, and operational excellence.
- Automated infrastructure provisioning, configuration management, and operational workflows using Terraform, Ansible, Python, and Bash, reducing manual effort and improving deployment consistency.
- Built and maintained observability platforms using ELK Stack, Prometheus, Grafana, Zabbix, CloudWatch, and centralized logging solutions to improve system visibility and incident detection.
- Developed automation solutions for monitoring, alert management, incident response, health checks, and operational remediation, improving engineering productivity and reducing operational overhead.
- Implemented and optimized CI/CD pipelines to support automated build, testing, deployment, and release processes across development, staging, and production environments.
- Managed and supported containerized applications running on Kubernetes and Docker, including deployment troubleshooting, capacity planning, performance tuning, and production support.
- Led production incident management, root cause analysis (RCA), problem management, and service restoration activities, reducing MTTR and improving platform reliability.
- Configured monitoring, alerting, log analytics, and performance dashboards to proactively identify system issues and ensure compliance with SLI, SLO, and availability targets.
- Collaborated with development, cloud, security, and infrastructure teams to improve system reliability, deployment processes, operational efficiency, and platform scalability.
- Implemented Infrastructure as Code (IaC) and DevOps best practices, including automation, version control, configuration management, continuous integration, continuous delivery, and cloud-native operations.
- Participated in 24x7 on-call support for critical production systems, performing incident triage, troubleshooting, escalation management, and post-incident reviews.
- Leveraged AWS services including EC2, EKS, S3, IAM, CloudWatch, Lambda, SNS, and VPC to deploy, monitor, secure, and maintain enterprise-scale production workloads.

PROJECTS

Cloud-Native Observability Platform 3 Months

- Built a cloud-native observability platform for monitoring containerized applications and infrastructure across AWS and Kubernetes, integrating Prometheus, Grafana, and ELK for centralized metrics, logs, dashboards, and alerting, with Terraform and Python automation for repeatable infrastructure and operational workflows.
- AI-Based Alert Correlation Engine

2 Months
- Developed an AI-assisted alert correlation engine using Python and GenAI to aggregate, deduplicate, enrich, and prioritize alerts from ELK and Prometheus, providing incident context and automated summaries to accelerate troubleshooting and reduce alert fatigue.

EDUCATION	
B.Tech / B.E. Computer Science and Engineering (CSE) Maharshi Dayanand University, Rohtak Grade - 8/10	2022
